Remote Keypad KP-11
– Easy to install, simple to use, and full system power at your fingertips!

- **Two-Way Radio Communication**
- **Dual Frequency Hopping**
- **Code Encryption**

KP-11 is a wireless, high tech, and durabal remote keypad that allows you to control your security system from wherever it is deployed. It communicates with a Control Panel via radio wave, sending signals to "**Arm**", "**Part arm**", & "**Disarm**" the system.

Bi-directional Radio Communication is used, and features **Dual Frequency Hopping** to ensure infallible signal transmission to and from the Control Panel by avoiding any possible interference form the external world. On the other hand, **Code Encryption** secures the data code form copying by evildoer.

Safeguarded by a **Tamper Proof Switch**, protects the enclosure from being opened or removed from the mounting surface. **Power conservation** is another design feature; the Remote Keypad consumes power only when in operation, thus ensuring long battery life.

Features:

- Bi-directional Radio Communication
- Dual Frequency Hopping & Code Encryption
- Single key press to **inquire System Mode** (Arm / Home / Disarm mode)
- **2 Dual color LED** & **1 single color LED** for System Status, System Mode & Fault Indication
- A 16-button **backlit keypad** for easier night use
- Power conservation that consumes power only when in operation
- Low Battery detection

- Tamper protection protects the enclosure from being opened or removed from it's mounting surface

- **IP- 44** Water Proof

- Compact & low profile

- Complied with CE requirements

Specifications:

- Power: Lithium CR2450 battery x 1

- Battery life: 4 years or over[1]

- Radio frequency available: 868.6375 / 868.6875 MHz Narrow FM

- Range: over 300 meters in open space

- Operating temperature: -20° to 50°C

- Humidity: up to 95% non-condensing

- Dimensions: 103 X 72 X 18 mm

* Note[1]: Battery life is calculated at an average of 4 activations per day.
